Dear Hiring Team,

I'm a technology and operations leader with 20+ years driving large-scale cloud, telecom, and data-platform programs across Fortune 50 enterprises. At Microsoft I led a 21-person cross-functional engineering and architecture team delivering Azure Nexus, a next-generation hybrid-cloud platform for global telecom operators — coordinating backlog, CI/CD, and deployment cadence across 10 development teams. At AT&T I directed delivery of Network Cloud 2.0 (Kubernetes/OpenStack), a \$30M+ portfolio spanning 6 programs and 350+ features that enabled 50M+ subscriber capacity.

I'm PMP- and CSM-certified and known for aligning engineering, product, and business strategy to ship mission-critical platforms on schedule. I'd welcome the chance to bring that track record to your technical-program-management team.

Best regards,
Nicholas Karsten
